

I use a simple hash function to speed up the lookup as follows.

```
//simple hash function  
int fx = 255;  
for (int j = 0; j < len; j++)  
|   fx = fx + p[j];  
if (fx > 4094)  
|   while (fx > 4094)  
|       fx -= 3839;
```

Thanks.
